Childs Gallery Collections is the latest publication in a tradition of more than seventy years of gallery publications. The *Childs Gallery Bulletin* (begun 1950), the *Print Annual* (begun 1976) and the *Painting Annual* (begun 1980) have been firmly established and are represented in almost every fine arts library in the country. As early as the mid-1940s, however, Childs Gallery presented a publication entitled *Currier and Ives Prints: A Collection*, which represented the carefully considered collection of a single owner with Charles D. Childs' commentary that "we cannot recall that a representative collection of these lithographs has been shown in Boston for many years."

We continue to celebrate collections, collecting, and collectors as a pivotal axis of the art world with this seventh volume of *Childs Gallery Collections – On Solid Ground: Iconoclast Sculptor Dudley Vaill Talcott*. Childs Gallery has a long tradition of introducing twentieth-century American figurative sculptors and we are pleased to welcome Dudley Vaill Talcott to an illustrious group including Donald De Lue, Walker Kirtland Hancock, and Albert Wein.

With special thanks to the artist's daughters, Emily, Lucinda and Jane.

Waitress or *Childs Restaurant Waitress* is Talcott's version of an employee of the once-popular chain of eateries. Talcott exhibited this sculpture in wood at the Museum of Modern Art in 1930. In reviewing this exhibition, Helen Read said of Talcott's sculpture: "Mr. Talcott uses sculpture as a medium for expressing his reaction to life about him. He doesn't find modern clothes or the occupations and pastimes of today unsympathetic to plastic expression. Hence it is not surprising to find that he has found sculptural material in a 'Childs' Restaurant Waitress."

On Solid Ground: Iconoclast Sculptor Dudley Vaill Talcott

In 1930, five sculptures by Connecticut native Dudley Vaill Talcott were included in the “Living Americans” group show at the Museum of Modern Art in New York. Despite the heady company, including Arthur Dove, Charles Sheeler, Stuart Davis and Marsden Hartley, Talcott’s works stood out.

There was *The Wrestler* (1929), a seven-foot-tall aluminum robot-man right out of Fritz Lang’s *Metropolis*. (When exhibited at the Los Angeles Summer Olympic Games in 1932, the Machine Age colossus gained quite a bit of notoriety.) No less modern was the sharply angled *Six Day Cyclist* (1926). Though firmly anchored in metal blocks, the forward racing bronze figure echoed the futurists’ kinetic sense of perpetual movement. Talcott also displayed his whimsical side in the geometrically abstracted *Child’s Restaurant Waitress* (1928), playfully mythologizing a well-known uniformed server of the time. Made of carved wood, the aproned statue was an irresistible cubist tour de force. (Versions of the last two pieces are now on display at Childs Gallery.)

The New Yorker art critic Murdock Pemberton had this to say about the three-dimensional works in the 1930 MOMA show.

The sculpture exhibit at the Museum of Modern Art is alive; which is about the first time an exhibit of sculpture in America has been alive. There is Gaston Lachaise, a boldover from the period when only the classic was thinkable, and yet possessed of some divine fire. Then there is Calder, a humorist in a medium that is too often soggy with selfconscious dignity. Last, and perhaps most important, is Dudley Talcott, a worker in all sorts of mediums who is aware that he lives in an age of skyscrapers and reality that can be beautiful even if material and mechanistic. We think Talcott alone among the Americans has invaded a field that has remained static and brought it to a consciousness of what is afoot in our world. It is really a thrilling show.

Many others agreed. A Boston arts reporter wrote of Talcott: “He is an energetic experimenter who was exposed to regular art training at Yale and in Paris but who professes not to have been infected with any lasting traces of the school and studio pedagogy.” Talcott had in fact dropped out of Yale—after attending several prep schools—before moving to Paris in 1920. There he eschewed any formal arts study in favor of drop-in courses at the Académie de la Grande Chaumière, supplemented with frequent visits to grand museums and immersion in the electric post-WWI modern art culture of the city.

“The world of architecture was in the throes of a revolution at this time,” Talcott also noted. “It centered around the transition from the use of masonry to the use of steel as a building material—a greater change perhaps than had taken place throughout the preceding twenty centuries.”

The accumulated knowledge from those early days, both classical and avant-garde, would be referenced throughout Talcott’s prolific career. Like Modigliani, the sculptor was fascinated by Egyptian carved stonework at the Louvre, evidenced in works like his massive bas-relief panels commissioned for the General Foods Building at the 1939 New York World’s Fair.

The influence of cubism could be seen in many of the sculptor’s strongest works, from recognizable figures, like his blocky bronze fisherman *The Loafer* (1936), to purely abstracted forms that exude a joyous dynamism. (Examples of both are in the Childs show.)

Talcott also experimented with analytic cubism, as in his geometric 24-foot-high granite and steel outdoor monument to astronomer Nicolaus Copernicus (1973), still on view today in Philadelphia; and an abstract-pop fusion exemplified by a series of 20 x 8 foot commissioned concrete murals and a 100 foot long fiberglass window for six Pennsylvania public schools.

In his later works, the sculptor’s form-follows-function gate, towering fountains, and architectural plaques seamlessly blended the organic curves of Art Nouveau with the highly stylized symmetry of Art Deco and the Bauhaus. Further modernizing the concept, Talcott was an early adapter of the latest industrial building materials, such as aluminum, hydrocal plaster, fiberglass and resin.

Initialed on base. From the estate of the artist. Two known lifetime casts exist: one cast in 1936 and now in the collection of the Tweed Museum of Art, Duluth, MN, the other privately commissioned in 1974. Posthumous edition of 12 available in bronze.

This was most likely the first major sculpture completed by Talcott upon his return from the Arctic Circle. It is possible that *The Loafer* (also called *The Loafing Fisherman*) is a sculpted portrait of Isak Isaksen, the skipper of the *Norkap II*, as well as Talcott's father-in-law, mentor, and friend. Isaksen and the *Norkap II* feature in Talcott's book, *Report of the Company*, published in 1936.

Provenance: Fifty/50 Gallery, New York; to, John P. Axelrod.

Talcott exhibited this sculpture at the Museum of Modern Art in 1930. In reviewing this exhibition, Helen Read said of the work: "The 'Six-Day Bicycle Rider' is an extraordinary performance. Mounted on a pedestal at an angle of 45 degrees it achieves an effect of terrific momentum without losing its plastic quality of sculpture."

These plaques are reduced models for four of the six 6 x 12 feet plaster panels that made up *The Gathering of Various Types of Food*, a work originally designed for the entranceway to the Central Foods Building at the 1939 New York World's Fair.

Two known lifetime casts exist: a set of two 2-sided pink cement panels, each depicting two scenes from the original six panels, and this set of four 1-sided fiberglass panels, each depicting one scene. The original 1939 plaster panels were destroyed. We believe that these are some of the earliest fiberglass sculptures cast by Talcott circa 1950s.

[CONTINUES FROM PAGE 7] That Talcott didn't become as internationally famous as his peers was completely of his own doing. While his works were often exhibited in prestigious venues like New York's Whitney Museum of American Art and The Art Institute of Chicago, and he received large-scale public and private art commissions throughout his career, the prolific modernist was an iconoclastic contrarian who worked and lived primarily to please himself, rather than the art world.

Being born into a prominent and wealthy Hartford, Connecticut family facilitated his early artistic freedom, leaving him unfettered by commercial concerns. But even when money was tight in later years, as he was married with children, Talcott remained stubbornly individualistic.

That included nine years (1926-1935) of off-and-on boat fishing in Norway, Iceland, and the Arctic Circle. Drawn to the area's natural beauty, workmen and adventurous spirit, Talcott became part owner of a 75-ton fishing vessel known for taking sportsmen on polar bear hunting expeditions. He wrote two very entertaining books of that period, *Noravind* (1929) and *Report of the Company* (1936) (the latter so successful Random House publisher Bennett Cerf suggested he become a full-time adventure writer), complete with personal photographs and delightfully satirical woodblock-inspired illustrations that he hand-carved onto individual plates for pressing.

Though primarily known as a sculptor, Talcott would gain much praise for his incisive, often amusing drawings, many of which are in the current retrospective at Childs. Included are witty allegorical depictions from a 1953 advertising brochure Talcott created to promote Helio-Courier airplanes, a twenty-year obsession for the artist. (The "Space Race" became a huge influence in Talcott's abstract sculptures and fountains.)

Like Rockwell Kent before him, Dudley Vaill Talcott was a man of innumerable interests and talents. The Childs Gallery retrospective is an inclusive overview of Talcott's many styles, including roughly 50 pieces of sculpture, half a dozen paintings, and numerous original drawings. Small works range from modernist utilitarian objects (ashtrays, picture frames, trivets, and carved bowls,) to bronze sculptures of the curvilinear female form and organic animals (including *The Ox*, first exhibited at New York's Whitney Museum of American Art in 1938). On a more monumental scale are cast bronze garden wall frieze, concrete cast architectural panels, fiberglass plaques, and a magnificent 7 x 6 foot cast aluminum gate, once installed in Talcott's Farmington, Connecticut home, which the artist built from the ground up.

"Art has to be good or else it's an eyesore," Talcott was fond of saying. "Sculpture must have grace, rhythms, and balanced spaces."

From the estate of the artist. One known lifetime cast in bronze exists, now in the collection of the National Museum of Wildlife Art, Jackson, WY.

The Jackal is influenced by the interest in all things Egyptian resulting from the discovery of King Tut's tomb in the 1920's, an event Talcott would have learned about while abroad.
